

- Timed charges: Some charges such as anesthesia are based on a units of time, so the charges may vary based on the units charged.
- Drugs and implants: Drugs, implants and supplies are priced individually based on the cost loaded into our information systems at the time of charging, so they do not have individual prices listed. The typical methodology will take the cost in place at the time, multiplied by a markup percentage.
- Estimated Total Charges of Procedure/Stays/Visits etc can be obtained by contacting -AJ Karpinski at 218-546-2507. All charges are then subject to Insurance contract payer reductions. To get any accurate representation of patient final cost, I would strongly encourage contacting us to accurately predict final price -costs of services
