# Introduction

Greetings,

Every three years, Cuyuna Regional Medical Center (CRMC) conducts a Community Health Needs Assessment (CHNA) to systematically identify, analyze and prioritize community health needs. The process is conducted in collaboration with many community partners including the Crow Wing County Health Department and organizations or individuals that represent broad interests in the community.

A CHNA is foundational to improving and promoting the health of a community. The health of the community is described along with factors that contribute to health challenges and resources that can be utilized to improve the community's health. The CHNA also helps ensure that CRMC's resources are directed toward where they can make the greatest impact.

In 2018, CRMC prepared its first CHNA and is proud to report that through its guidance has made numerous improvements in the health of community residents.

To avoid duplication of efforts and to achieve a more comprehensive CHNA, in addition to its own efforts, CRMC utilized existing information from the 2020-2022 Essentia Health/St. Joseph's Medical Center CHNA, Crow Wing County Health Rankings, and Minnesota Department of Education student surveys. To understand the social, economic, and health status of area residents, statistics were also collected from state, county, and local sources.

Following analysis of all data sources, CRMC identified its top three priority areas to address. They are mental health, nutrition and activity. CRMC looks forward to partnering with other organizations to coordinate action plans, pool resources, and jointly address the priorities of this assessment over the next three years to address its mission of improving health.

CRMC's commitment to community health goes well beyond the CHNA. Through contributions of more than \$100,000 annually to numerous community organizations, we're working together with our communities to improve the health of residents. In addition, we're proud to say our employees annually donate more than 3,000 hours of their time and talents to a variety of programs.

**Kyle Bauer, CEO** 

Cuyuna Regional Medical Center

# Cuyuna Regional Medical Center Overview

Cuyuna Regional Medical Center consists of a 25-bed critical access hospital, four physician clinics, a 85-bed nursing home and is a partner with Presbyterian Homes and Services in operating a senior living community with 50 independent living apartments, 36 assisted living apartments, 12 memory care apartments and 16 memory care suites. A locally governed 501(c)(3) nonprofit organization, CRMC is the second largest employer in Crow Wing County.

A community-built facility, CRMC serves more than 60,000 people in the Brainerd Lakes, an area known as Minnesota's vacation destination because of its beautiful lakes and woodlands offering a variety of outdoor recreation opportunities. With an average daily census of 18 patients, CRMC serves approximately 2,200 inpatients and 150,000 outpatients annually and has nearly 10,000 ER visits and about 260 births. The majority of CRMC's patients, 65 percent, reside in Brainerd, Baxter, Longville, Aitkin, Onamia and their surrounding areas. Another 35 percent of its patients live in the Hospital Districts of Bay Lake, Crosby, Cuyuna, Dean Lake, Deerwood, Emily, Fairfield, Fifty Lakes, Irondale, Ironton, Little Pine, Perry Lake, Rabbit Lake, Riverton, Trommald and Wolford.

CRMC furthers its mission by promoting the health of the community through programs and activities that foster health, healing and wellness. CRMC knows that much of what influences health happens outside of the hospital or doctor's office – in our schools, workplaces and neighborhoods. Just as its care teams devote themselves to meeting the needs of patients, CRMC is driven to address its

specific community health needs with wellness screenings, health education, health fairs and other community outreach. CRMC proactively recruits the physicians and specialists needed to meet the community's healthcare needs and works hard to retain its medical staff. CRMC strives to know what kind of providers are going to be needed and then plans and allocates resources accordingly. The organization also assesses the demographics and practice patterns of current staff to show potential recruiting candidates that there is a need for their services.

## **Average Annual Statistics**

Daily Census	18
Inpatients	2,200
Outpatients	150,000
Clinic Visits	72,000
ER Visits	10,400
Surgeries	6,400
Births	260
Net Revenue \$1	10 Million
Employees	944
Physicians	50

CRMC is governed by a nine-member, nonprofit Board of Directors consisting of four leaders who live in areas geographically representative of CRMC's service area, two District Board members, two medical staff and the CEO. The Board's primary responsibility is to assure the services provided by CRMC meet community standards, promote patient safety and ensure the hospital is providing the highest quality of health care services to the communities CRMC serves. CRMC also has an 18-member District Board elected by residents of its communities. Members of this group assure that payment on the outstanding debt and other obligations of CRMC are satisfied.

## Caring for the Community

Community benefit is part of CRMC's identity to promote the common good. We do this through programs and activities that foster health, healing and wellness, and those which directly address community need. It is also a living example of the CRMC mission and values in action as we strive to achieve our health care vision.

As a community-based hospital and health care provider, CRMC's mission is to improve the health of the community and provide quality health care services for all citizens, regardless of ability to pay. Each year, CRMC gives back to the community through education, health services, donations, and free and reduced cost health care to ensure that financial issues do not prevent patients from seeking or receiving care.

CRMC makes significant efforts to ensure charity care is granted to all patients who qualify. Each year, a significant amount of services are provided to low-income patients at free or reduced prices and are provided to those who have exhausted third-party resources, do not qualify for Medicaid or have insufficient incomes. CRMC also experiences losses in the unpaid costs of Medicaid for low-income individuals. The Cuyuna Lakes Area has a high need for several health care services that do not generate enough revenue to cover the cost of providing them. CRMC subsidizes those services to ensure their availability to our community.

The organization also provides health-related education to the community through events, classes, lectures and wellness screenings completely free-of-charge to the community. Year-round courses on first aid, CPR, childbirth, breastfeeding, and diabetes prevention as well as support groups on memory loss, brain injury and stroke, cancer and weight loss are offered. Nearly 10,000 residents are reached through these effforts annually.

CRMC also supports other organizations and initiatives that share its goal to improve the health of our community with cash donations that benefit the health, social, cultural, and educational needs of the area. In addition, CRMC staff donates time, materials, and leadership to more than 50 community groups including various schools; Cuyuna Lakes, Brainerd Lakes and Nisswa chamber of commerces; Hallett Community Center; Northland Arboretum; Race for the Cure; Kinship Partners; Crosby, Ironton, Cuyuna and Deerwood fire departments and others. Because food insecurity is a great need for the area, CRMC annually invests about \$20,000 towards free summer lunch and holiday break meals for students, healthy food at community events, and stocking the Cuyuna Food Shelf.

Services provided to low-income patients at free or reduced prices, provided to those who have exhausted third-party resources, do not qualify for Medicaid or have insufficient incomes

**2017** - \$104,365

2018 - \$123,969

**2019** - \$82,837

**2020** - \$459,127

Unpaid costs of Medicaid for low-income individuals

**2017** - \$1,766,925

**2018** - \$2,091,151

**2019** - \$2,14,175

**2020** - \$2,122,833

Subsidized services (ER, Care Center, Home Health & Hospice, Obstetrics)

**2017** - \$2,014,107

**2018** - \$963,905

**2019** - \$976,825

2020 -

Cash and in-kind donations

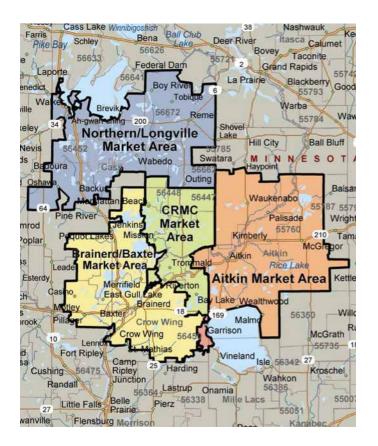

**2017** - \$44,300

**2018** - \$72,870

2019 - \$119.768

**2020** - \$145,072

CRMC also invests approximately \$3 million per year in capital improvements such as new equipment, facilities, and technology infrastructure.

## Service Area

## **Primary Area:**

56441 - Crosby

56444 - Deerwood

56447 - Emily

56448 - Fifty Lakes

56455 - Ironton

56465 - Merrifield

56662 - Outing

## **Secondary Area:**

56431 - Aitkin

56401 - Brainerd

56425 - Baxter

56450 - Garrison

56442 - Crosslake

56449 - Fort Ripley

56468 - Nisswa

56472 - Pequot Lakes

56473 - Pillager

56435 - Backus

56474 - Pine River

56655 - Longville

56672 - Remer

# **Mission:**

Accommodating you with care and compassion by dedicating ourselves to you every day.

## **Vision:**

**Cuyuna Regional Medical Center** will be the best place to receive care, practice medicine, and work.

## Values:

People - We are committed to having highly engaged team members through training, teamwork and communication.

Quality & Safety - We strive to consistently provide the highest levels of safe and quality care.

Service - We are committed to our Standards for Excellence and strive to exceed the expectations of those we serve.

**Innovation -** We are committed to a supportive environment that encourages new ideas and creativity.

Stewardship - We honor our heritage and hold ourselves accountable for preserving our human, financial and natural resources.

# **Demographics**

The majority of CRMC's patients, an estimated 80 percent, live in Crow Wing County.

# **Factors that Influence Health**

What makes some people healthy and others unhealthy? Many factors combine to affect the health of individuals and communities. These factors collectively are known as determinants of health. Sciences generally recognize five determinants of the health of a population, according to the Centers for Disease Control and Prevention. They are genes and biology, health behaviors, social and economic factors, physical environment and medical care.

## Genes and Biology

## Examples of biological and genetic determinants of health include:

- Age. For example, older adults are biologically more likely to be in poorer health than adolescents because of the physical and cognitive effects of aging.
- Gender. Men and women may acquire different diseases at different ages.
- Heredity. An individual may carry genes that increase his or her risk for certain diseases, like breast cancer, cystic fibrosis or hemophilia.

## Social and Economic Factors

Social determinants of health reflect social factors into which people are born, live, learn, play, work and age. They impact a wide range of health, functioning and quality-of-life outcomes.

A range of personal, social, economic and environmental factors can contribute to individual and population health. These factors-sometimes called social determinants of health—can be responsible for unequal and avoidable difference in health status in our communities. For example, people with a quality education and stable employment tend to be healthier throughout their lives.

#### Examples of social and economic factors include:

- Availability of resources to meet daily needs, such as educational and job opportunities, living wages or healthful foods
- Social norms and attitudes, such as discrimination
- Exposure to crime, violence and social disorder
- Social support and interactions
- Exposure to mass media and emerging technologies, such as the internet and smart phones
- Socioeconomic conditions such as poverty
- Quality schools
- Transportation options
- Public safety
- Residential segregation

## **Health Behaviors**

Individual behavior also plays a role in health outcomes. Many public health and health-care interventions focus on changing individual behaviors such as substance abuse, diet, and physical activity. Positive changes in individual behavior can reduce the rates of chronic disease in the country, state and county.

Individual behavior can directly affect personal as well as population health. Chronic diseases like cancer, heart disease and diabetes are leading causes of death in our county, state and nation. We can prevent or at least reduce the risk of these diseases through changes in our behavior.

For example, if a person guits smoking, his or her risk of developing heart disease or lung cancer is greatly reduced. Other examples of positive health behaviors include increasing physical activity, eating sensibly and avoiding excessive drinking.

Young people sometimes put their health at risk by engaging in behaviors such as unprotected sex or use of alcohol, tobacco or illicit drugs. These risky behaviors can have both immediate and lifelong consequences.

#### Examples of individual behavior determinants of health include:

- Diet
- Physical activity
- Tobacco use
- Alcohol and drug use
- Seat belt use
- Sleep pattern
- Hand washing

## **Physical Environment**

Humans interact with the environment constantly and these interactions affect our length and quality of life. The World Health Organization (WHO) defines environment as it relates to health as "all the physical, chemical and biological factors external to a person, and all the related behaviors." WHO estimates that environmental factors are responsible for about 25 percent of all disease. The physical environment includes not only the natural environment which is generally outside of our control but also the environment we build to live in called the "built environment."

#### Examples of environmental factors include:

- Natural environment such as plants, weather and climate change
- Build environment such as buildings and transportation
- Worksites, school and recreational settings
- Housing, homes and neighborhoods
- Exposure to toxic substances and other physical hazards
- Physical barriers, especially for people with disabilities
- Aesthetic elements such as good lighting, trees or benches

Poor health outcomes are often made worse by the interaction between individuals and their social and physical environment. For example, millions of people in the United States live in places that have unhealthy levels of ozone or other air pollutants. Poor air quality can worsen asthma symptoms, especially in children.

## **Medical Care**

Access to health-care services and the quality of those services can greatly impact an individual's health. For example, when individuals don't have health insurance, they are less likely to participate in preventive care and more likely to delay medical treatment.

#### Barriers to accessing health services include:

- Lack of availability
- High cost
- Lack of insurance
- Limited language access
- Inadequate transportation

#### These barriers to accessing health services lead to:

- Unmet health needs
- Delays in getting appropriate care
- Inability to get preventive services
- Hospitalizations and emergency room visits that could have been prevented

# **2021-2023 Community Health Needs Assessment**

This CHNA is a systematic, data-driven approach to determining the health status, behaviors and needs of resident in Crow Wing County. The report contains some intriguing and sometimes disturbing glimpses into the lives and health of residents. The information is being used to inform decisions and guide efforts to improve community health and wellness.

## Methodology

This report is the result of a November 2020 community health and a key stakeholders group surveys, CRMC clinic patients Body Mass Index statistics and mental health screening results. Information from results of the 2020-2022 CHNA developed by Essentia Health/St. Joseph's Medical Center in Brainerd as well as Crow Wing County statistics were utilized. Data from the U.S. Census and State of Minnesota is also included in this report. The purpose of this report is to quantify, using data received, the health status and needs of residents in CRMC's service area.

Statistics are essential when trying to evaluate and improve the health of communities. They provide evidence upon which to base sound decisions. They help to demonstrate whether the strategies used to combat health problems are effective and whether the money spent on them is money well spent. They help to identify trends that deserve our attention. And they helped to identify where CRMC should target community resources when those resources are limited.

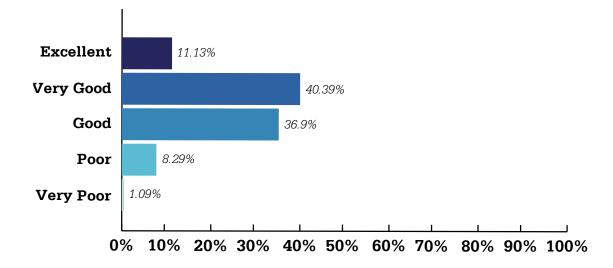

# **Health Findings**

## **Health and Wellness Survey**

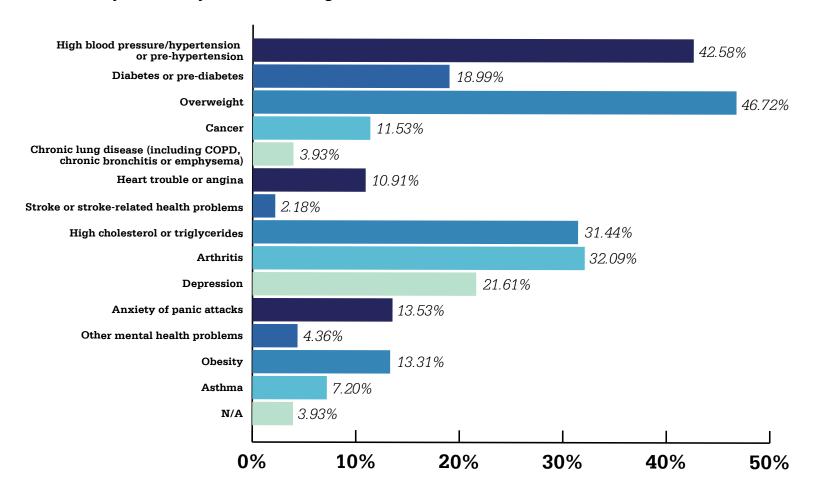

A total of 4,539 electronic surveys were distributed in November 2020 to area residents. A total of 458 of those surveys, or about 10 percent, were returned. The same questions used in a 2018 community survey were asked to compare exact data. The top five issues identified were: overweight (47%), high blood pressure (43%), arthritis (32%), high cholesterol (31%), and depression (22%).

## Survey results are as follows:

In general, which of the following best describes your health?

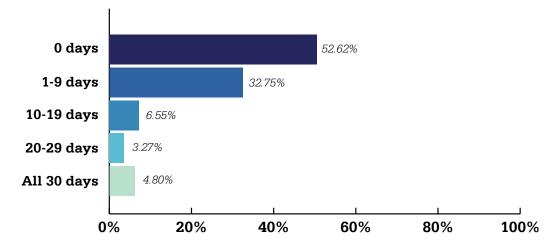

2. Have you ever been told by a doctor, nurse, or other health professional that you had any of the following health conditions?

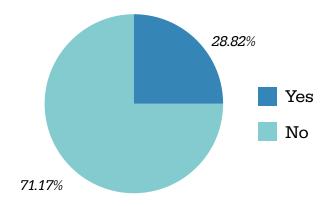

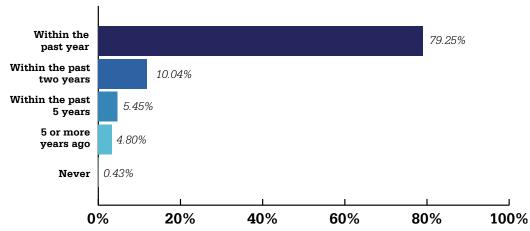

3. Thinking about your physical health, which includes physical illness and injury, for how many days during the past 30 days was your physical health not good?

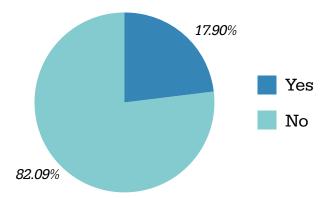

4. During the past 12 months, was there a time when you thought you needed medical care but did not get it or delayed getting it?

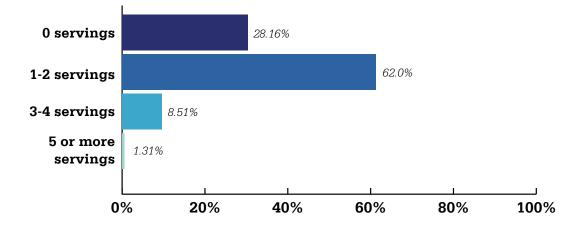

5. How long has it been since you list visited a dentist or dental clinic for any reason?

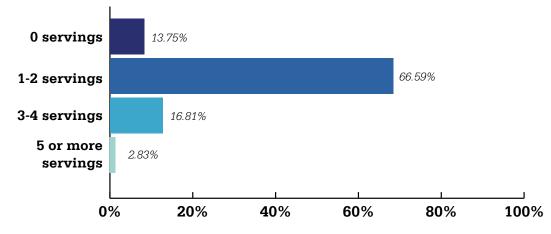

6. During the past 12 months, was there a time when you wanted to talk with or seek help from a health professional about mental health issues such as stress, depression, excessive worrying, troubling thoughts or emotional problems, but did not or delayed talking with someone?

7. A serving of fruit is a medium-sized piece of fruit or a half cup chopped, cut, or canned fruit. How many servings of fruit did you have yesterday? (Do NOT include fruit juice).

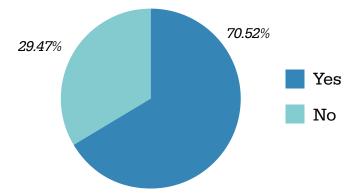

8. A serving of vegetables is one cup of salad greens or a half cup of any other vegetables, not including french fries. How many servings of vegetables did you have yesterday?

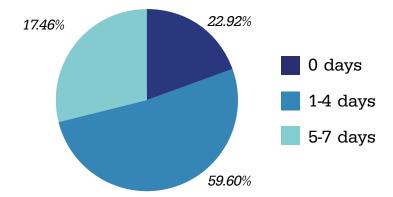

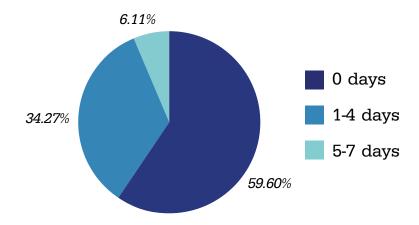

9. During the past 30 days, other than your regular job, did you participate in any physical activity or exercise such as running, calisthenics, golf, gardening or walking for exercise?

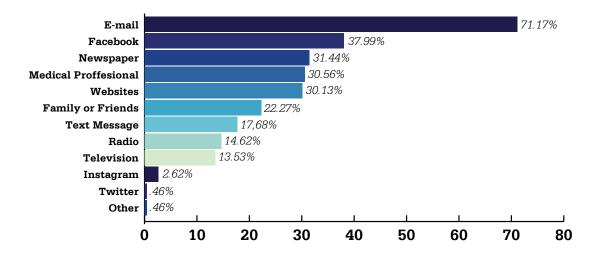

10. During an average week, other than your regular job, how many days do you get at least 30 minutes of moderate physical activity? Moderate activities cause only light sweating and a small increase in breathing or heart rate.

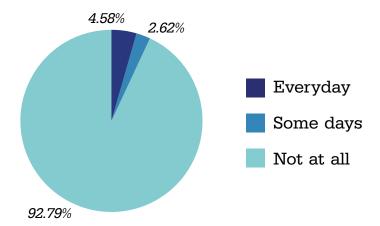

11. During an average week, other than your regular job, how many days do you get at least 20 minutes of vigorous physical activity? Vigorous activities cause heavy sweating and a large increase in breathing or heart rate.

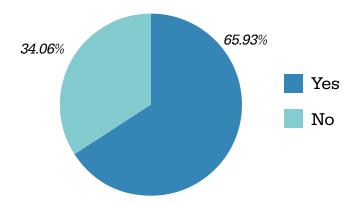

## 12. Where do you prefer to hear about health and wellness information or events in Crow Wing County?

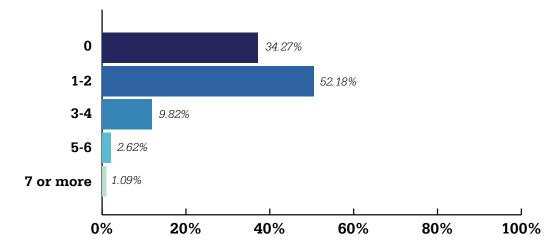

#### 13. Do you smoke cigarettes every day, some days, or not at all?

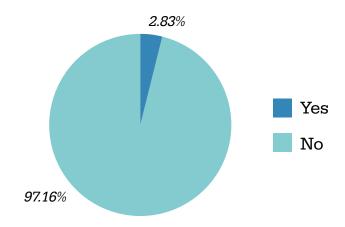

## 14. During the past 30 days, have you had at least one drink of any alcoholic beverage such as beer, wine, a malt beverage, or liquor?

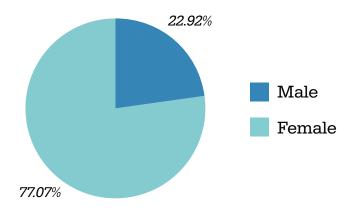

15. During the past 30 days, on the days when you drank, about how many drinks did you drink on average? (One drink is equivalent to a 12-oz. beer, a 5-oz. glass of wine, or a drink with one shot of liquor).

16. Are you in a relationship where you are (or have ever been) physically hurt, threatened, or made to feel afraid?

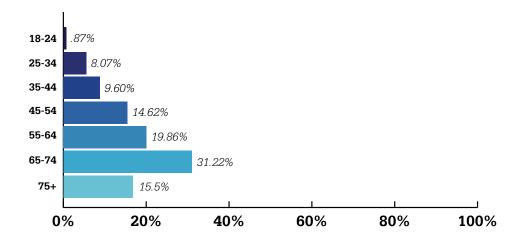

17. Are you:

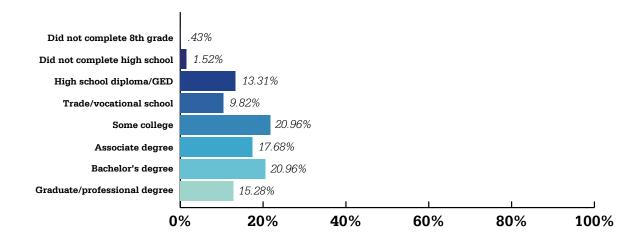

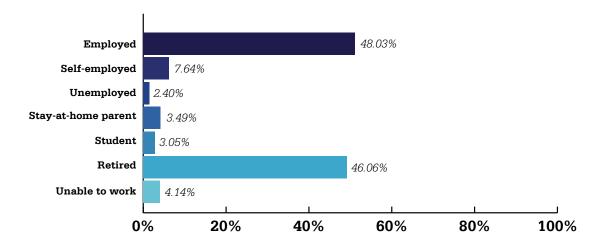

#### 18. Your age group:

#### 19. Your education level:

#### 20. Are you currently:

## **Key Stakeholders Survey**

To solicit input from key stakeholders during the COVID pandemic—those individuals who have a broad interest in the health of the community-CRMC conducted an electronic survey in November 2020.

#### The following tool was utilized:

Cuyuna Regional Medical Center is in the process of planning for its 2021-2023 Community Health Needs Assessment and we are requesting your input. Please complete the survey below by Friday, Dec. 4. Thank you!

In 2018, CRMC implemented its first CHNA with the goals of decreasing obesity and overweight rates, addressing mental health issues and increasing the number of advance care directives in place. We made several strides in all the areas. A report of our accomplishments can be viewed at https://www.cuyunamed.org/about-us/ community-health-needs-assessment

To avoid duplication of efforts and achieve a more comprehensive CHNA, in addition to its own efforts CRMC is utilizing results of Essentia Health/St. Joseph's Medical Center 2020-2022 CHNA. Their priorities are: Substance abuse: People no longer desire tobacco products; Nutrition: eat fruits and vegetables every day; Physical activity: people are active every day; and Mental health: people experience good mental wellbeing most days.

CRMC proposes focusing on the following priorities for 2021-2023 based on key areas that showed a lack of or need for additional improvement from previous efforts. They are: Improve Mental Health Wellbeing - 12% of adults report 10 or more days in the past month of not good mental health; Nutrition - 66% of adults do not eat five or more fruits and vegetables a day; and Activity - 65% of adults do not meet recommended physical activity.

In your professional experience, what areas of focus do you suggest CRMC work on to improve the community's health?

How would you prioritize these areas?

What tactics do you suggest CRMC implement to make a difference in these areas?

Would your organization be willing to partner with CRMC in working on these efforts?

Please provide ideas for any additional strategies.

Would you be willing to serve on a committee to tackle these issues? If so, which area would you like to work on?

If so, what day and time would best meet your schedule for quarterly, virtual meetings?

Thank you for your input. Please provide your contact information in case we have further questions.

## **Key Stakeholders Survey Results**

88 surveys sent, 14 responses

#### **Participants**

Ivan Bartha, General Manager, Hallett Center of Crosby

Scott Goddard, Crow Wing County Sheriff

Dr. Kristin Furan, Psychologist, Cuyuna Regional Medical Center

Rebekah Kent, Dean of Brainerd Career & Technical Programs, Central Lakes College

Tamara Larsen, Director, Lakes Area Food Shelf

Chris Lindholm, Superintendent, Pequot Lakes School District

Jill Mattson, Wellness Studio Owner, Uplifted Wellness Studio

Stephanie Nelson, Critical Care Director, Cuyuna Regional Medical Center

Mary Novotny, Data Processing Analyst, Cuyuna Regional Medical Center

Kara Terry, Director, Crow Wing County Public Health

Dr. Jamie Skjeveland, Superintendent, Crosby-Ironton Schools

Kristi Westbrock, CEO, CTC

Lynne Wiebke, Clinic Administrator, Great River Eye Clinic

Jennifer Wiedell, Director Home Health and Hospice, Cuyuna Regional Medical Center

#### Top Health Priorities Identified

- Mental health adults and youth
- Physical activity
- Nutrition

#### Questions

#### In your professional experience, what areas of focus do you suggest CRMC work on to improve the community's health?

- Addiction/mental health services and availabilities for adults and children 8
- Healthy food choices 7
- Physical activity 7
- Advanced Care Directives 1
- Understanding the COVID-19 situation and the importance of masks and social distancing -1
- Health needs of low-income kids in our community 1
- Extended screen time 1
- Tobacco use 1
- Strengthening communities and families 1

#### How would you prioritize these areas?

- Mental health adults and youth 7
- Physical activity 4
- Nutrition 3
- COVID-19 medical and financial 1
- Tobacco use 1
- Health of low-income kids 1
- Advanced Care Directives 1

#### What tactics do you suggest CRMC implement to make a difference in these areas? Nutrition

- Community partnerships that encourage healthy choices
- Education on processed foods and how detrimental they are to our lives
- Promoting the consumption of five fruits and veggies a day as whole food is spot on. Promotion of eating 'clean' and what that means in one's diet
- Kids nutrition
- Coupon booklet with healthy food choices
- Simple recipes for people to follow
- Sample grocery lists (that are affordable)

#### Physical Activity

- Partner with Community Education, local gyms, senior centers, and youth programs to create community challenges with incentives. I don't think we engage our community education departments effectively enough. For example, it would not be hard to pull the community education directors for Crosby, Pequot, and Brainerd together to push a county-wide physical activity challenge
- Let's be well so all are well popped up. I think giving a sense of "we are in this together" makes one feel like they are not alone venturing through these trying times. "Crosby Cares" can still be a mantra to lead the cause of staying smart and supportive. Mailings to all in the Cuyuna Lakes area to rally and say that as our number one health care facility you are there for us to BE WELL in whatever the need may be. Offer free webinars on each aspect of health: mind, body, spirit.
- Emphasis on walking as a form of exercise
- Could CRMC do a program for the community that would get them involved in keeping track of how much exercise they do each week, what they are eating each day, and also the component of "pausing" to be still and meditate on what is good in their lives in lieu of what has been taken away? Maybe it could be like playing a Bingo game each week and there could be some incentives to achieve and stay on a program for their wellness. That could be a fun winter project as well as instilling good habits.
- Ways to be more active in the winter. It seems that COVID will affect our ability to be active this winter season. Our families are affected similarly with our children having the absence of school sports.

#### Mental Health

- Recovery from COVID
- SMILE Program with Smiles for Jake
- Remote/mobile services, community incentives/initiatives and more support groups this is a beast of an issue and relates to lack of resources in rural areas. Exploring more telehealth options for mental health.
- As we move out of COVID and people living in fear for so long, I question how people will adapt to the new normal. Will they want to retreat, be alone, sit behind a screen in their houses and become hermits? Or will they be able to move back to the pre-COVID way of living life.
- I don't know anything about treating addicts, I just know that I have seen a large population of friends/relatives drinking daily. Will that ever stop if they are blaming it on COVID?
- Community Education, expanded services, work with schools
- Meet with County staff to discuss further as I am not sure of the tactics quite vet.
- Expand psychology department. Hire more therapists. Trainings. Support and community events.

#### General Feedback

- Don't work in isolation. Be conspicuous in your efforts to partner with the Chamber and the school, especially community education.
- COVID-19 Community Education

#### Would your organization be willing to partner with CRMC in working on these efforts?

Yes - 13

No - 1

#### Please provide ideas for any additional strategies.

- Healthy eating incentives for kids
  - Healthy eating incentives for kids (like the program they had at the Farmer's Market-tokens for kids)
  - Something in the grocery store? A manned table with healthy snacks and information
  - A community garden for kids
- Mental Health
  - Must change the stigma related to mental health, reaching people while young and in a learning setting will aid in removing the negativity
  - Identification of mental health needs in the community through this assessment.
- Community Partnerships
  - Hallett Community Center
  - Engaging with churches might be a way to reach an older audience.
  - Take care of your employees first . . . then they are well equipped to help us be well.
- COVID
  - Programs/information regarding the mental health implications of COVID-19.

#### Would you be willing to serve on a committee to tackle these issues?

Yes - 10

No - 4

If so, which area would you like to work on?

- Mental Health 5
- Physical Activity 1
- Nutrition 1
- Community Initiatives 1
- Open 4
- N/A 4

## **Cuyuna Regional Medical Center Clinic Patients BMI Statistics and Mental Health Screenings**

## Adult Depression Screening 2020 (January-October):

7,061 patients screened -1,046 or 14.8% screened positive

## Adolescent Depression Screening 2020 (January-October):

443 patients screened - 101 or 22.8 % screened positive

## **Crow Wing County Student Surveys**

Crow Wing County Public High Schools	Students
Brainerd High School	1,909
Crosby-Ironton Secondary	491
ISD 181 Learning Center	149
Lincoln Education Center (alternative school)	62
Pequot Lakes Senior High School	587
Forestview Middle School	1,997
Middle Level Alternative Program	17
Pequot Lakes Middle School	6
Total Students	5,218

Minnesota Department of Education 2019 Student Survey Reports for 1,367 Crow Wing County students showed similar results for overall health, mental health, nutrition and activity. The surveys were voluntary and anonymous. Students were not required to answer every question so the totals may not equal 100%.

#### **Participating Students**

Grade 5	189 students
Grade 8	133 students
Grade 9	588 students
Grade 11	457 students

#### The following student data reports and analytics were reported:

## **General Health and Conditions**

## 2020-2022 Essentia Health/St. Joseph's Medical Center CHNA

Essentia Health-St. Joseph's Medical Center is part of Essentia Health, a nonprofit, integrated health system caring for patients in Minnesota, Wisconsin, North Dakota and Idaho. The 162-bed hospital serves the Brainerd Lakes area and has provider clinics in Baxter, Brainerd, Crosslake, Emily, Hackensack, Pequot Lakes, Pierz, Pillager and Pine River as well as a rehabilitation facility in Brainerd.

From January 2018 to March 2019, Essentia Health-St. Joseph's Medical Center analyzed data, convened community partners, sought input from community members, and led a process to identify the following priority areas for the 2020-2022 Community Health Needs Assessment:

- A. Substance abuse
- B. Nutrition
- C. Physical activity
- D. Mental health

The 2020-2022 Implementation Plan outlines the multiple objectives, activities and strategies to address each priority area.

Substance Abuse Goal: People no longer desire tobacco products.

**Nutrition Goal:** People eat fruits and vegetables every day.

Physical Activity Goal: People are active every day.

Mental Health Goal: People experience good mental wellbeing most days.

#### Assess

Essentia Health and Crow Wing County Public Health worked with the Minnesota Department of Health to conduct a survey to assess community health needs in 2017. The survey was formatted by the survey vendor, Survey Systems, Inc. of New Brighton, MN, as a scannable, self-administered English-language questionnaire. The 52-question assessment included questions on topics including: general physical health, mental health, health behaviors, etc.

A two-stage sampling strategy was used for obtaining a probability sample of adults living in Crow Wing County. For the first stage of sampling, a random sample of Crow Wing County residential addresses was purchased from a national sampling vendor (Marketing Systems Group of Horsham, PA). Address-based sampling was used so that all households would have an equal chance of being sampled for the survey. Marketing Systems Group obtained the list of addresses from the U.S. Postal

Service. For the second stage of sampling, the "most recent birthday" method of within-household respondent selection was used to specify one adult from each selected household to complete the survey.

An initial survey packet was mailed to 4,000 sampled households in Crow Wing County on October 5, 2017, that included a cover letter, the survey instrument, and a postage-paid return envelope. About 10 days after the first survey packets were mailed (October 13), a postcard was sent to all sampled households, reminding those who had not yet returned a survey to do so, and thanking those who had already responded. Two weeks after the reminder postcards were mailed (October 27), another full survey packet was sent to all households that had still not returned the survey. The remaining completed surveys were received over the next five weeks, with the final date for the receipt of surveys being December 4, 2017.

Completed surveys were received from 1,084 adult residents of Crow Wing County for an overall response rate of 27.1% (1,084/4,000).

The responses from the completed surveys were scanned into an electronic file by Survey Systems, Inc. To ensure that the county level survey results are representative of the adult population Crow Wing County, the data were weighted when analyzed. The weighting accounts for the sample design by adjusting for the number of adults living in each sampled household. The weighting also includes a poststratification adjustment so that the gender and age distribution of the survey respondents mirrors the gender and age distribution of the adult population in Crow Wing County according to U.S. Census Bureau American Community Survey 2011-2015 estimates.

#### **Prioritize**

Needs were prioritized based on key areas that showed a lack of improvement from the 2015 Crow Wing County Community Health Survey to the 2018 Crow Wing County Community Health Survey (Appendix C, Appendix D). Those key areas were then presented to the Crow Wing Energized Steering Committee for approval. The Steering Committee members (Appendix F) represent different groups within the community: school, workplace, faith, low-income, aging, government, social services, etc. The steering committee approved four priority areas:

- A. Substance abuse
- B. Nutrition
- C. Physical activity
- D. Mental health

#### **Community Input**

During the 2019 Crow Wing Energized Summit, 200 community members participated in a facilitated discussion on one of the four areas of concern, where they were able to provide feedback on how to create change surrounding that topic. Following the summit, smaller focus groups were facilitated using Results Based Accountability (Appendix G) to prioritize strategies, find the story behind the data and agree upon a common result in each of the four areas.

## Essentia Health/St. Joseph's Medical **Center CHNA Key Findings**

## **Priority #1 Substance Use**

### **Supporting Data:**

Tobacco use in Crow Wing County is increasing. The Crow Wing County Health Survey states that tobacco use in adults has increased from 17.6% (2015) to 23.3% (2018). Not only has tobacco use increased but the number of smokers trying to quit has decreased. In 2018, less than half of cigarette smokers reported trying to guit, which is 1/3 fewer than in 2015.

The 2018 Crow Wing County Health Survey found an interesting trend related to health disparities; 44% of the population using tobacco have a household income of less than \$20,000 and report higher rates of obesity, depression and anxiety.

The 2018 Minnesota Youth Tobacco Survey, which was administered to over 4,100 students, states that while the use of many tobacco products continued to decline for youth, e-cigarette usage continues to increase.

Community Input: During the 2019 Crow Wing Energized Summit, the increase in e-cigarettes and vaping led to passionate discussions and worry for youth. Groups needed to be reminded of traditional tobacco use still being an area of concern.

#### **Community Strengths and Resources:**

- Essentia Health St. Joseph's Medical Center Tobacco Specialists
- Crow Wing Energized Tobacco Coalition
- American Lung Association
- · Local schools investing in youth-focused tobacco surveys
- Community conversations

#### **Community Strategies:**

- Strategy #1: Advocate for policies that limit accessibility and appeal for youth to use tobacco products like the Tobacco-21 policy.
- Strategy #2: Enhance and promote tobacco cessation interventions and resources.
- Strategy #3: Promote workplace incentives that encourage employees to quit smoking

## **Priority #2 Nutrition**

#### **Supporting Data:**

The 2018 Crow Wing County Health Survey shows 65.7% of adults are not eating 5 or more fruits and vegetables a day, which is no improvement from the 2015 survey. Consuming the recommended amount of fruits and vegetables reduces the risk of chronic diseases including Type 2 Diabetes, some cancers, obesity and cardiovascular disease. However, the number of individuals eating the recommended amounts are low.

In 2018, 238 Crow Wing County food shelf clients participated in a 29-question survey. Of those surveyed, 96% said they want to provide more fresh fruits and vegetables to their families, but 48% said that it was difficult to obtain fresh produce. (Appendix E)

#### **Community Input:**

Attendees of the 2018 Crow Wing Energized Summit participated in identifying barriers for nutrition.

Identified barriers for consumption of fruits and vegetables include:

- 39 respondents Junk food culture/sugar addiction
- 30 respondents Cost and shelf life
- 17 respondents Education/knowledge
- 14 respondents Availability and seasonality

### **Community Strengths and Resources:**

- National Diabetes Prevention Program
- Healthy Weight and Your Child
- Farm to School
- Worksite wellness programs

#### **Community Strategies:**

- Strategy #1: Promote and increase participation in the National Diabetes Prevention Program.
- Strategy #2: Support and encourage new local businesses to offer worksite wellness programs that encourage nutrition like the ReThink Your Drink campaign, health vending machine policies, etc.
- Strategy #3: Support and promote campaigns and programs that encourage eating more fruits and vegetables like "One Vegetable, One Community."

## **Priority #3 Physical Activity**

#### **Supporting Data:**

The Crow Wing County Health Survey indicates that 64.1% (2015) and 64.9% (2018) of residents are not meeting the recommended amount of moderate or vigorous physical activity recommendations. The 2018 County Health Rankings stated that 22% of Crow Wing County adults, age 20 and over, report no leisure-time physical activity. Physical activity can improve an individual's health and reduce the risk of type 2 diabetes, some cancers and cardiovascular disease.

#### **Community Input:**

Attendees of the 2018 Crow Wing Energized Summit participated in identifying barriers for nutrition.

Identified barriers for meeting physical activity standards include:

- 42 respondents not enough time
- 25 respondents lack of supportive network
- 17 respondents winter weather
- 16 respondents costs of memberships

#### **Community Strengths and Resources Available:**

- National Diabetes Prevention Program
- Healthy Weight and Your Child
- Local trails for walking, biking, running, etc.

#### **Community Strategies:**

- Strategy #1: Support and encourage new local businesses to offer worksite wellness programs that encourage physical activity like walking meetings, yoga and exercise rooms, etc.
- Strategy #2: Promote and support point-of-decision prompts for physical activity throughout the community, like motivational signs on or near stairwells, elevators, escalators, encouraging people to use the stairs.

## **Priority #4 Mental Health**

### **Supporting Data:**

The 2018 Crow Wing County Community Health Survey reports that 28.2% of residents are impacted by mental illness. The National Alliance on Mental Illness estimates 1 in 5 adults in the country experience mental illness. The data suggests that either Crow Wing County residents have higher rates of mental illness or are more inclined to self-report a mental illness. The 2018 Crow Wing County Health Survey also showed that the percent of people experiencing 10 or more days in the past month of "not good mental health days" decreased from 2015 to 2018. In 2015 13.1% reported having "not good mental health days" in the past month compared to 12% in 2018. The current community efforts from 2015 to 2018, including resiliency building and stigma reduction campaigns, have been successful but larger initiatives need to be implemented to significantly decrease the number.

Community Input: The local daily newspaper, Brainerd Dispatch, published its top stories from 2018. The number two story focused on mental health. The article titled "Mental health awareness comes to forefront following suicides" discussed what the community was doing after a string of suicides. A community panel was led by Central Lakes College President Hara Charlier, Brainerd Lakes Chamber of Commerce President Matt Kilian, Essentia Health-Central President Adam Rees and Brainerd High School student Caroline Benson to share their personal "mental health journeys."

#### **Community Strengths and Resources Available:**

- Crow Wing Energized Mental Fitness Goal Group
- Crow Wing Energized ARC Task Group
- Make It OK
- Bridges of Hope Self Healing Communities Project
- Crisis Line
- Northern Pines Mental Health Center
- Nystrom's and Associated
- Northern Psychiatric
- Lakeland Psychiatric
- Wellness in the Woods
- Region V+ Mental Health

#### **Community Strategies:**

- Strategy #1: Build resilience, optimism, positive self-concepts and hopefulness through tools like the resiliency toolkits, sleep booklets, "Three Good Things" notepads, attitude of gratitude trees and resiliency bookmarks.
- Strategy #2: Encourage health-seeking behaviors through stigma-reduction campaign like "Make It OK" and campaign to make community aware of existing resources
- Strategy #3: Support life-skill building and mindfulness-based stress reduction programing in worksites, schools and communities.

#### Design

Essentia Health worked with internal stakeholders as well as community partners to design a strategy to address each of the priority needs identified in the CHNA process. The plan outlines actions that will be taken to respond to the identified community needs including goals and measurable objectives, strategies, tactics, and performance indicators.

The implementation plan is a three-year plan to address priority needs. The implementation plan will be reviewed annually, with progress shared with hospital leadership and the Board of Directors on an annual basis.

Additionally, the following three priorities were determined by the Community Health Advisory Committee (CHAC) at a retreat in January 2019. The retreat included input from Community Health staff from across the Essentia Health system. Prioritization was based on common themes from the 15 Community Health Needs Assessments.

- · Mental health and wellness
- Substance use
- Nutrition and physical activity

# **Health Findings Summary**

After reviewing all the information and statistics contained in this report, CRMC compiled a preliminary list of the healthcare issues that were identified. They are listed not in any specific order as follows:

- Obesity/overweight
- Diabetes
- Lack of nutritious foods
- Not meeting activity guidelines
- High blood pressure
- High cholesterol
- Access to health care
- Affordable services
- Education

- Smoking/tobacco use
- · Lack of mental health services
- Substance abuse
- Depression
- Anxietv
- · Panic attacks
- Stress
- Arthritis

## **Final Selected Priorities**

CRMC selected the following as final priorities to address in 2021-23:

**Mental Health** Nutrition **Activity** 

#### **Priorities Not Selected:**

Many of the other health issues were not selected because efforts in these three areas would also impact those issues. For example, in addressing mental health issues, CRMC will also tackle substance abuse, depression, anxiety, panic attacks, and stress. If CRMC is successful in improving nutrition and increasing activity, it will reduce the obesity and overweight rates, address the lack of nutritious foods, reduce diabetes, high blood pressure and high cholesterol. By encouraging individuals to be more active, overweight rates will be reduced together with stress and depression.

Other issues were not chosen because they consistently ranked as a lower priority in the surveys and statistics.

#### **Community Health Priorities**

The following community health improvement plan outlines how CRMC in partnership with Crow Wing County organizations plans to improve the health of residents over the next three years. Specific improvement strategies are included within each of the priority areas. CRMC believes that implementing these strategies will help it achieve its vision for a healthier community.

## **CRMC Priorities for 2021-2023**

#### Improve Mental Health Wellbeing

- 12% of adults report 10 or more days in the past month of not good mental health
- 11-34% of youth feel down depressed or hopeless for several days in a month

#### **Improve Nutrition**

- 66% of adults do not eat five or more fruits and vegetables a day
- 6-18% of youth did not eat any vegetables in the past 7 days
- 1-10% of youth did not eat any fruit in the past 7 days

#### **Increase Activity**

- 65% of adults do not meet recommended physical activity
- 2-16% of youth were not physically active for 60 minutes a day in the last 7 days

## Improve Mental Health Wellbeing

- Suicide prevention
- · Depression/anxiety screening
- Substance abuse prevention
- Social engagement opportunities (pandemic related loss of social connections)

#### Objective:

- Decrease percentage of adults who report poor mental health (less than 12%)
- Decrease percentage of youth feeling down, depressed or hopeless for several days (less than 16%)

#### Strategies:

- Offer depression and anxiety screening in clinics and at community events

- Crosby and Deerwood City Council presentations (50)
- 2018: Provided one-on-one Healthcare Directive assistance (43)
- 2019: Provided one-on-one Healthcare Directive assistance (31)
- 2019: Advance Care Directives given to CRMC employees (277)
- 2020: Provided one-on-one Healthcare Directive assistance (60)
- 2019: Advance Care Directives given to CRMC employees (277)
- 704 Advance Care Directives received at CRMC: 2018-76, 2019-400, 2020-228

# Conclusion

As a non-profit, community hospital, CRMC is called to make a healthy difference in people's lives. This CHNA illustrates the importance between CRMC and its community partners. By working collaboratively, CRMC can continue to have a positive impact on the health needs of the community. Other ways that CRMC will continue to indirectly address local health include providing charity care and other patient assistance to the under and uninsured and subsidizing essential services. CRMC will work with the community to ensure this plan is effective and make modifications as needed.

Dedicated to You. Every Day.
